Possible MESA Title:

Video Game Therapy for Depression and Anxiety/Stroke Patients/Cerebral Palsy

Solar Roadways: Redefining Energy

Innovative Smart Phone Applications

Space Transportation

Possible Robotics Title:

Artificial Intelligence Advancements in Robotics Research

Nanorobotics and Cancer Research

New Developments in Robotics and Prosthetic Limbs

Abstract (1 Paragraph):

In 3-5 sentences, describe what your research is about.

Introduction (1 Paragraphs):

Why is this topic important? Why should scientists and researchers dedicate time and resources to finding a cure or solution to this problem? *What is the general public perception about this topic?

Discoveries and Innovations (2 Paragraphs):

What new discoveries and innovations did you discover? Who made these discoveries and what university/hospital/organization do they work for? When was the discovery made? What scientific conferences has this discovery been presented at? What scientific journals has this discovery been published in?

Applications in Medicine (MESA/Robotics Scholars--1 paragraph):

How can these discoveries be applied to medicine or cancer research? How can scientists, health care providers, and the general public use this knowledge?

Addressing the Disparity (Anatomy Scholars--1 paragraph):

How do the discoveries that you uncovered help or hurt addressing health disparities?

Graph/Chart

Conclusion (1 paragraph):

How do you think scientists can use the information you found? What future problems may arise? What questions or problems still remain unanswered? What will scientists need to do in order to address these remaining problems?
